

M&O Facility CN-I245 and CN-I246 Pre-Bid RFI Log

Issue Date: 5/2/2018

RFI #	RFI Date	Question	Response
1	4/5/2018	The plans and details all call out TPO Roof Membrane but the spec calls for PVC. Which is correct?	New roofing is NOT included, nor required, in the Scopes of Work for either the two packages being re-bid. The existing roofing will remain at the M&O Office building.
2	4/18/2018	The parking area around the new M and O Office is highlighted on sheet ASI.2. Sheet ADI.0 includes the details associated with highlighted area of ASI.2. Sheet A5.0 indicates new concrete stairs and railing. However, during the pre-bid meeting I believe it was stated that there is no site work in this bid package. Please clarify the scope of work for bid package CN-I246 in regard to fencing, concrete, railings, AC paving, and pavement markings.	Reference Addm I List of Items, Additional Information #3, dated 4/18/2018. Any sitework indicated on the M&O T.I. drawings will be by others. The fencing, concrete, railings, AC paving, and pavement markings are Not-In-CN-I246 Contract.
